SMART-ID
New way of using e-services

Register new Smart-ID
I already have Smart-ID

Create custom PIN2 code
5-12 digit code that is used for signing

Authenticating via biometric identification

1. Capture a photo of your ID document
2. Scan your ID document with smart device app
3. Scan your ID document

Smart-ID

Smart-ID is the safest and fastest way to verify your identity online, register in e-services and sign documents. The Smart-ID application is simple, and intuitive, even for users who lack digital confidence. Universal automated biometric identity verification (UABIV) is a fully remote process that enables service providers to verify customers and issue them with a secure digital access token, Smart-ID. The whole process is carried out online using a smart device and a national document with biometric data.

Why Smart-ID?

Legally binding signature

Equal to a handwritten signature

Compliant

PSD2, eIDAS, GDPR, and AML compliant

Cross-country Usage

Cross-country, cross-service and multi-device usage

Safe and strong

Meets high authentication requirements

Benefits of remote onboarding

- Globally scalable**
 supports documents from 55+ countries
- Fully remote**
 saves your business time and money
- Quick**
 user enrollment takes a few minutes

Requirements for remote onboarding

- An NFC-enabled mobile device
- A biometric passport or a chip-based ID card
- 5 minutes of uninterrupted time
